Chris:

I need to determine the most appropriate way to get this residential sewer repaired. I need your help.

1. Have ERRS find a plumber to do it. They have not had much luck because of all of the government paperwork involved.
2. Allow the homeowner to get it fixed and we reimburse. Not sure the appropriate mechanism to do the reimbursement if we go this route and what the cost limitations are for this.

Thanks,

Gary W. Moore (6SF-ER)
